

Why *autonome*?

There are many environmental control units (ECUs) and speech generating devices on the market today, making it very confusing to understand both the differences and benefits. So, what makes the *autonome* different from traditional ECUs and SGDs? Well, for starters, the *autonome* transforms a high level SGD into a high level integrated ECU and SGD. In other words, you get all of the good stuff in one single package!

The *autonome* is actually a package consisting of a Grid Pad by Smartbox, select environmental control accessories and the experienced installation services of an ASI technician. It is the first of its kind to integrate both comprehensive ECU and SGD technology in a single package.

Let's take a look at the *autonome*'s available features and how it compares to most single ECUs and SGDs*:

	ECU	SGD	<i>autonome</i>
Complete Control of Your Environment	X		X
Home Automation Integration	X		X
Voice input/access method	X		X
Customized Speech Generation		X	X
Augmented Speech		X	X
Dynamic Visual Display (option)		X	X
Turn On Lights	X	X	X
Control Bed	X	X	X
Control Television/DVR/DVD Remote	X	X	X
Call for Nurse or Help	X	X	X
Thermostat Control	X	X	X
Smart TV or Streaming device	X	X	X
Microsoft Applications		X	X
e-Mail Access		X	X
Eye Gaze		X	X
Touch		X	X
Technical Remote Access Support		X	X

Technology evolves quickly and through the years, our clients count on us to offer the most integrated and advanced ECU/SGD options on the market.
