

autonoME Residential

autonoME Residential

Our goal is to help our clients achieve maximum independence and quality of life where it matters most...in the home. The autonoME Residential package is easy to use, giving users the ability to control numerous devices while creating a seamless experience

Best of all, one of our trained technicians comes to the home to install and fully configure the system for the user. With our residential environmental control solution, there's no need to sacrifice the comfort our users deserve. The autonoME Residential was designed to be fully customizable to our client's needs.

Contact us today for more information on how we can enhance your quality of life.
